

MANIKANTA SAI YADLAPALLI

(330) 690-1404 | ymani4342@gmail.com | Houston, TX, USA | <https://www.linkedin.com/in/manikantasaiyadlapalli/>

PROFESSIONAL SUMMARY

Highly Skilled, Gen AI Engineer and Software Developer with 3+ years of experience building and deploying AI-powered applications. Hands-on experience integrating Anthropic to design agentic workflows, engineer production-grade prompts, and build AI-assisted development pipelines. Built and deployed HireRadar a full-stack AI job search platform live on Microsoft Azure using Claude AI for autonomous multi-step agentic processing, JSearch API for real-time job aggregation, and GitHub Actions for CI/CD. Skilled in C#, ASP.NET Core, REST APIs, cloud-native Azure deployment, and AI-assisted software delivery.

CERTIFICATIONS

- Hacker Rank Skill Certification Test – ID: 9DAEACB24A9A
- Hacker Rank Software Engineer Certificate – ID: A3A8BOAD32EF

PROFESSIONAL EXPERIENCE

U.S. Bank

Houston, TX, USA

Software Engineer

May 2025-Present

- Designed, developed, and enhanced MVC-based enterprise applications using **C# and .NET Framework**, focusing on **performance, scalability, and long-term maintainability**.
- Applied **prompt engineering** techniques across 3 specialized Claude AI agents research agent, message writer, and scoring agent each with **structured system prompts, output constraints** and **JSON response parsing** to ensure consistent, production-quality AI output.
- Performed **smoke, functional, regression, and UAT testing**, identifying and resolving defects before production deployment.
- Configured **GitHub Actions CI/CD pipeline** every push to main branch automatically builds, publishes, and deploys to Azure App Service in under 3 minutes with **zero manual steps**.
- Built **Kanban-style application tracker** with 5 pipeline stages backed by **SQL Server** with Entity Framework Core and a UX confirmation flow ensuring only verified applications are tracked.
- Implemented **secure AI application architecture** .NET User Secrets locally, Azure App Service Application Settings in production no credentials ever committed to version control.

DXC Technology

Bangalore, India

Associate Professional Software Engineer

Aug 2021– Sep 2023

- Designed and executed **manual and automated test plans and regression suites** for web and mobile applications.
- Executed manual and automated test cases using **Selenium** for **UI** testing, building reusable scripts to increase regression coverage.
- Reduced bug leaks to production through enhanced unit testing, achieving code coverage and minimizing post-release defects.
- Implemented **JavaScript** and **TypeScript** enhancements to optimize application performance by 15%.
- Logged, tracked, and resolved defects using **JIRA**, providing detailed reports and collaborating with cross functional teams.
- Created automated regression suites for multiple modules, improving testing efficiency and reducing release cycle time.
- Collaborated with developers and product owners to define acceptance criteria, refine test cases, and enhance QA process quality. systems.
- Collaborated with QA teams during **build, deployment, and release validation activities**, ensuring release readiness.
- **Trained** and **mentored** over 20 team members, providing guidance on coding standards, debugging techniques, and best practices, which improved overall team productivity and code quality.

Kent State University

Kent, OH, USA

International Admissions Student Worker

Sep 2023 – May 2025

- Worked with the Office of Global Education,
- Evaluated international graduate student documents for computer science and data science programs.
- Calculated and Converted GPAs of international graduate students to accurately assess their academic performance, resulting in a more comprehensive picture for admissions decisions.

SKILLS

- **Programming Languages:** C#, ASP.Net Core, JavaScript, HTML, CSS, ADO.Net, ASP.Net MVC, Entity Framework, Angular.js, React.js, API Testing, Node.js, LINQ, Bootstrap
- **Testing Tools:** Selenium, Postman, JIRA, MF ALM, Jenkins
- **Databases:** Mongo DB, Microsoft SQL server
- **Others:** Linux, GitHub, Visual Studio Code, Tableau, Excel, Power Point.

EDUCATION

Kent State University

Kent, OH, USA

Master's, Computer Science

GPA: 4.0

Relevant Coursework: Machine learning, Advanced Database System Design, Information Visualization, Security of Cloud and Distributed System, Big Data Analytics, Data mining techniques, Probabilistic Data management

SRM University

Andhra Pradesh, India

Bachelor's, Electronics and Communication Engineering

GPA: 4.0

Relevant Coursework: Python Programming, Introduction to JavaScript, Operating Systems, Data Structures and Algorithms, Data Visualization, Statistics, Computer Architecture etc.,
